Dunne's Home and Porch Repair

Project:
Dunne's Home and Porch
Cartersville, GA
Owner: Mr. Dunne

Installation Contractor:
Warren Concrete Inc.
Atlanta, GA
phone: 706-781-5293

Description:

This project was performed in Cartersville, Ga. For Mr. Jerry Dunn. Mr. Dunn's home and porch had been built in 2004. The porch area of his home had begun settling due to unknown circumstances in which created a void of approximately 1.5" at the top of the porch face.

Design:

Each pier was installed at approximately 14' before reaching a torque capacity of 20 kips. Upon 4 piers being installed at 6' feet apart each pier section was equipped with lifting bracket accessories and lifted to the original constructed position.

Construction:

Wood bracing was installed behind the wall to prevent the wall from bowing in upon backfill procedures. Once backfill was in place the bracing was removed.

Contacts Concerning This Project:

Mr. Jerry Dunn Ph. 770-607-9430
